# How does Git Work?

**Remote**

**Remote Repo**

git push    git fetch     git fetch     git push

**Local**                                **Local**

**Local Repo**                        **Local Repo**

git commit                           git commit

git checkout               git checkout

**Staging Area**                    **Staging Area**

git add                               git add

**Working Directory**            **Working Directory**

edit                                     edit
